Department of Computer Science and Engineering

Course Name: Analysis and Design of Algorithms Laboratory
Course Code: BCSL404

Open-ended Questions - Leetcode Questions

Sl. No.	Algorithm Design Strategy	Problem Statement
1.	**Divide and Conquer**	Search Insert Position – Easy https://leetcode.com/problems/search-insert-position/
2.		First Bad Version – Easy https://leetcode.com/problems/first-bad-version/
3.		Kth Largest Element in an Array – Medium (Quickselect / Divide & Conquer) https://leetcode.com/problems/kth-largest-element-in-an-array/
4.	**Greedy Method**	Assign Cookies – Easy https://leetcode.com/problems/assign-cookies/
5.		Best Time to Buy and Sell Stock II – Easy https://leetcode.com/problems/best-time-to-buy-and-sell-stock-ii/
6.		Jump Game – Medium https://leetcode.com/problems/jump-game/
7.	**Dynamic Programming**	Climbing Stairs – Easy https://leetcode.com/problems/climbing-stairs/
8.		Maximum Subarray – Easy https://leetcode.com/problems/maximum-subarray/
9.		Coin Change – Medium https://leetcode.com/problems/coin-change/
10.	**Backtracking**	Letter Combinations of a Phone Number – Easy https://leetcode.com/problems/letter-combinations-of-a-phone-number/
11.		Binary Watch – Easy https://leetcode.com/problems/binary-watch/
12.		Permutations – Medium https://leetcode.com/problems/permutations/
13.	**Branch and Bound**	Combinations – Easy https://leetcode.com/problems/combinations/
14.		Path Sum – Easy https://leetcode.com/problems/path-sum/
15.		Word Search – Medium https://leetcode.com/problems/word-search/
